About Us

Founded in 1937, Ryder Scott is one of the largest and most respected evaluation consulting firms.

Ryder Scott Sustainable Energy consulting provides reliable evaluations of client's low-carbon and energy transition initiatives, as well as independent validations and verifications of greenhouse gas disclosures and assertions in the U.S. and internationally.

Experience levels of Ryder Scott professionals average more than 20 years per person. Our professionals' various educational, cultural, and work backgrounds blend together to create a diverse, yet cohesive, task-oriented team dynamic.

Ryder Scott recruits the top talent in the industry, equips them with the necessary tools and direction to perform at the highest level, and lets their motivation carry projects through to successful conclusions.

- Respect
- Reliability
- Reputation

Our Mission

To assist our clients in achieving their low-carbon, sustainable energy strategies.

Our Vision

Be the preferred energy consultant, known worldwide for quality, reliability, integrity, and independence.

What We Offer

Ryder Scott provides robust independent validations, certifications, and audits to its clients in the oil and gas sector. With the highest ethical and technical standards, Ryder Scott offers reliable evaluations of client's low-carbon and energy transition initiatives, as well as independent validations and verifications of greenhouse gas disclosures and assertions.

Ryder Scott can analyze and prepare detailed recommendations for facilities to meet compliance or to achieve emission reduction targets and forward-looking statements. Our surface and sub-surface integration expertise allows for us to provide evaluations of carbon capture, utilization, and sequestration projects and enhanced oil recovery. Our expertise in the upstream and midstream hydrocarbon energy industry positions Ryder Scott as the choice consultant for those companies diversifying their energy supply portfolio and solutions.

Ryder Scott will evaluate the technical feasibility of the project and associated costs, providing recommendations on design and innovation, at any stage of project maturity to deliver high-value assessments for our clients.
